

Clay tile roofing materials

Although they are individually fragile, clay products used for roofing purposes have together to withstand deformations of the roof. Lime-based mortars have important long-term elasticity properties ensuring the durability of the roof structure. The excellent workability of lime-based mortars, achieved without additives, enables the precise positioning of the tiles. Lime-based mortars are more easily removed for ease of tile recycling.

Technical Tradical® PF limes

	one 22kg bag of Tradical® PF70 to 90kg/120kg of sand or one 20kg of Tradical® PF80 to 100kg/130kg of sand
--	---

Traditional limes

Tradical® H	one 25kg bag of Tradical® H to 130kg/200kg of dry sand
OPC	one 25kg bag to 200kg/250kg of dry sand
