

## Renders & Plasters

In order to provide protection, plasters and renders must have several properties:

- > resistance to substrate deformation
- > resistance to thermal shocks
- > resistance to pollutants
- > waterproof properties
- > vapour permeability

There are other requirements that are environmental and economic. On whatever substrate, in new building or in renovation, Lhoist 's products fulfil all of these demands and provide long-term solutions.

## Renders & Plasters

### Technical performance

- > elasticity
- > vapour permeability
- > durability of performance

### Economic performance

- > workability
- > low maintenance cost
- > long lasting

### Environmental performances

- > positive CO<sub>2</sub> balance
- > low embodied energy
- > disinfectant properties

### The developed Tradical® lime products

are specifically designed to provide simple technical solutions.

<b>Tradical® H100</b>	Extra fine and high purity hydrated lime CL90 S For finishing plaster/render, limewash, stuccos.
<b>Tradical® PF80</b>	Lime-based binder with a controlled setting. For finishing plaster/render as well as for repointing, the various layers of a multi-layer render/plaster on very soft substrates.
<b>Tradical® PF70</b>	Lime-based binder with a controlled setting. For the various layers of multi layer plaster/renders.
<b>Tradical® PF55</b>	Lime-based binder with a controlled setting. For the first layer of multi layer plaster/render on harder substrates.
